Communications Hill profile 2016

Health status

	Communications Hill	SCC
<i>Maternal, child, and infant health</i>		
Births per 1,000 people	19.5	13.5
Low birth weight infants	7%	7%
Preterm births	8%	9%
Overweight or obese mothers in first trimester of pregnancy	34%	38%
Mothers who received early and adequate prenatal care	78%	74%
Teen live births per 1,000 females, ages 15-19	19.1	19.2
<i>Health behaviors</i>		
Adults who are uninsured (ages 18-64)	15% to 19%	14%
Adults 65 and older who received a flu shot in past 12 months	78% to 84%	79%
Children who received a flu shot in past 12 months (ages 6 months-11 years)	50% to 52%	48%
Adults who are obese	15% to 16%	19%
Children who are overweight for age (ages 2-11)	6% to 8%	12%
Teens who are overweight or obese (ages 12-17)	22% to 26%	10%
<i>Mortality</i>		
Life expectancy	81.5	83.4
Cancer deaths per 100,000 people	189.4	140.3
Heart disease deaths per 100,000 people	126.7	118.8
Alzheimer's disease deaths per 100,000 people	--	34.6
Stroke deaths per 100,000 people	--	27.8
Chronic lower respiratory disease deaths per 100,000 people	38.8	25.5
Unintentional injury deaths per 100,000 people	40.6	23.4
Diabetes deaths per 100,000 people	--	23.3
Influenza and pneumonia deaths per 100,000 people	--	14.3
Hypertension deaths per 100,000 people	--	14.6

Notes: * + indicates estimate is statistically unstable due to a relative standard error of greater than 30% (*) or less than 50 respondents in the denominator (-). These estimates should be viewed with caution and may not be appropriate to use for planning or policy purposes. Chronic lower respiratory disease includes asthma, COPD, bronchitis, and emphysema. Early and adequate prenatal care, also known as the Kotelchuck Index is defined as care initiated by the fourth month and receiving at least 80% of recommended prenatal visits. (--) indicates that the number of deaths was too low to report rates.
